Indiana's non-seasonally adjusted unemployment rate for October is 4.7 percent, ninetenths of a percentage point below the national rate of 5.6 percent, Alan D. Degner, Com-

missioner for the Indiana Department of Workforce Development, announced today. The number of Hoosiers employed during October 2003 was 3,060,600.

Indiana's October unemployment rate was lower than Illinois, 6.1 percent; Michigan, 6.9 percent; Ohio, 5.1 percent; and Kentucky at 5.3 percent.

"Indiana's unemployment rate dropped as a result of slight job gains from the previous month. Construction and the leisure and hospitality sector

were stronger than had been expected," commented Degner.

The monthly survey of 7,500 Hoosier employers reports payroll employment at 2,898,100 a decrease of 31,300 from one year ago and 13,000 more than last month. Payroll employment is an estimate of non-agricultural jobs in Indiana businesses. It differs from labor force employment which is used in the calculation of the unemployment rate by not including the self-employed and agricultural workers. In addition, payroll employment includes all those who work in Indiana, while the unemployment rate is calculated by those who live in Indiana.

Manufacturing employment totals 573,600 in October, a decrease of 18,000 from last year. Motor vehicle manufacturing accounts for 13,700 jobs, 900 more than one year ago. Manufacturing of motor vehicle parts totals 78,200. Machinery manufacturing in October accounts for 42,900 Hoosier jobs, 1000 less than September.

Construction employment totals 151,000 an increase of 2,600 from last month. Of that, heavy construction reports 19,000 jobs, the same as last month.

Service producing employment totals 2,166,200 in October, 22,700 less than last year. Transportation and public utilities total 119,900, 800 more than September.

Retail trade totals 340,100, 1,000 more than a year ago. Of that, general merchandise stores report employment of 75,600, or 400 less than last year.

Indiana's estimated labor force (the number of people 16 years of age and older who are able and available for work) totals 3,212,900 in October 2003. An estimated 3,060,600 Hoosiers are employed and 152,300 are unemployed.

Indiana's labor force for October 2002 totaled 3,196,200. Hoosiers employed one

*Due to an expansion in the Current Population Survey (CPS), mandated by Congress, estimates for June 2001 (revised) and later at both the state and substate levels may not be fully comparable with those of earlier periods. In analyzing data, be aware that over-the-year comparisons, may differ slightly from comparisons that would have been made using data without the sample expansion.
